

Storyboard Game

Print out the PDF file labeled story flashcard board game. Paste the board game onto a nice stiff piece of paper. Decorate the paper however you would like. I went to Dollarama Store and bought clear Protector Rolls. It's like a type of sticky lamination. I covered my board both front and back with it. I used 2 rolls.

Cards: Print the cards with the characters on it twice. It's best to print these on card stock 110 pound. Print one set of Main Character backs on regular paper and Conflict Character Backs on regular paper (By back, I mean the file that contains the words Main Character and Conflict Character). Cut out the backs and past to the character cards. You should have the same characters as both main and conflict characters. I.E. Frog as a main characters and frog as a conflict character.

Print the setting cards, object cards and genre card images on card stock. Print the backs of these cards on regular paper. (By back, I mean the files that contain the words: Setting, Object and Genre) Paste the backs and fronts together. Trim where necessary and laminate if you can.

Have fun!
