# File Managment

## **Learning Objective**

Creating and Saving files and folders

□ Folder views

Moving files and folders

### ■ Saving to Removable Storage devices

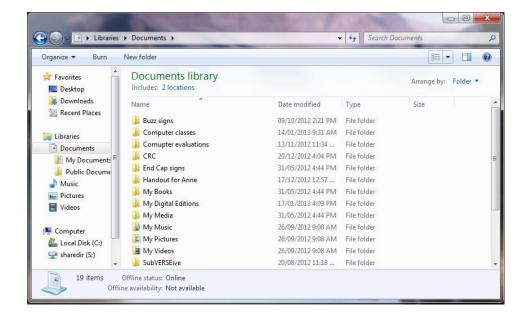

■ Searching for a file or folder

### **Files and Folders**

- Computers store files you create in folders
- Folders can hold files and other folders

### Files and Folders

### What's the difference?

Lorem javam dolor sit amet, consectener adipiscing elit. Praesent posuere ultrices tellus. Suspendise non quam. Phaselhas vulputate. Nam vel arcu. A File: is any individual item on your computer, be it a photo, a Word document, etc.. Files contain data of some sort.

### **Files and Folders**

A Folder: is a container for these files. It holds all of your files within it to keep things organized.
